CAREER OBJECTIVE

Currently working as a Flutter Developer Intern at Logidots, I am an enthusiastic Flutter developer with 2 years of hands-on experience, proficient in Dart and the Flutter framework. I possess in-depth knowledge of state management solutions like Provider and BLoC. Experienced in integrating APIs, optimizing app performance, and utilizing Git and GitHub for efficient version control. Strong problem-solving skills allow me to tackle complex challenges and debug issues independently, ensuring smooth development workflows. Eager to leverage my technical expertise to build high-quality, cross-platform mobile applications within a collaborative team environment.

PROFESSIONAL EXPERIENCE

Flutter Developer Intern   06/2024 – present
Logidots

PROJECTS

JaganArt - Art Courses
An Android application suite that simplifies art course management made for a client, with all functionalities backed by Firebase for a robust backend and reliable notification service. This two-part system consists of separate Admin and User apps. The admin app allow them to schedule live classes, upload pre-recorded sessions, and send targeted notifications to users. The User app keeps students informed and engaged by delivering notifications for new content and providing access to recorded sessions.

CREDKiT - Decentralized Loan Management System
Developed a decentralized loan management system using Flutter as frontend and Ganache as backend that revolutionizes the lending process by enabling direct interaction between lenders and borrowers, eliminating the need for intermediaries. Utilized smart contracts to formalize agreements, enhancing transparency and security in the lending process.

SpenX - Subscription Manager
Engineered an intuitive Android application using Flutter that empowers users to efficiently manage their subscriptions by providing timely notifications before due dates. Integrated a feature to inform users about alternative subscription options and their pricing, enhancing financial awareness and facilitating informed decision-making.

EDUCATION

Bachelor of Technology in Computer Science Engineering   2020 – present
APJ Abdul Kalam Technological University   Palghat, India

AISSCE   2018 – 2020
Jawahar Navodaya Vidyalaya   Palakkad, India
