CAREER OBJECTIVE

Currently working as a Flutter Developer at Logidots, I am an enthusiastic Flutter developer with 2+ years of professional experience, proficient in Dart and the Flutter framework. I possess in-depth knowledge of state management solutions like Provider and Riverpod. Experienced in integrating APIs, optimizing app performance, and utilizing Git and GitHub for efficient version control. Strong problem-solving skills allow me to tackle complex challenges and debug issues independently, ensuring smooth development workflows. Eager to leverage my technical expertise to build high-quality, cross-platform mobile applications within a collaborative team environment.

PROFESSIONAL EXPERIENCE

Flutter Developer

08/2024 – present

Logidots

- Developed and maintained cross-platform mobile applications using Flutter and Dart, ensuring seamless performance and user experience.
- Collaborated with cross-functional teams to design, test, and deploy features aligned with client requirements.
- Deployed apps on Google playstore and Apple appstore.
- Integrated RESTful APIs and optimized app performance.
- Integrated In-App subscriptions with RevenueCat for android and iOS.
- Implemented Razorpay and Cashfree payment gateways.
- Utilized Git/GitHub/Bitbucket for version control and code collaboration.

Flutter Developer Intern

06/2024 – 08/2024

Logidots

PROJECTS

Tukxi Driver

- Developed a high-performance ride-hailing and parcel delivery application for drivers using Flutter and Dart, focusing on a responsive and low-latency user experience.
- Integrated mapping services for real-time GPS route tracking, ensuring precise location updates and efficient navigation.
- Built a secure, multi-step onboarding flow for seamless driver document upload and verification.
- Engineered a dynamic dashboard utilizing efficient state management to display transparent, real-time earnings tracking and trip analytics.

Bastet Rising - Menopause Wellness Tracker

- Built a comprehensive, privacy-first cross-platform health application in Flutter, managing complex state for tracking irregular cycles and over 140 distinct symptoms.
- Integrated RevenueCat to implement and manage scalable in-app subscriptions, handling premium user access and entitlement syncing.
- Developed interactive data visualizations and charts that allow users to identify long-term physiological trends and patterns.
- Engineered a secure health reporting engine that aggregates user logs (treatments, weight, supplements) into exportable, private summaries for clinical consultations.

JaganArt - Art Courses

- Designed and developed a dual-application suite (Admin and Student portals) using Flutter to streamline course management and digital content delivery.
- Integrated Firebase ecosystem (Firestore, Firebase Auth) to provide a robust, real-time backend for cross-app data synchronization.
- Implemented Firebase Cloud Messaging (FCM) to deliver reliable, targeted push notifications regarding new content and scheduled live classes.
- Built a responsive media interface allowing students to seamlessly browse and stream pre-recorded video sessions on demand.

EDUCATION

Bachelor of Technology in Computer Science Engineering
APJ Abdul Kalam Technological University

2020 – 2024
Palghat, India

AISSCE
Jawahar Navodaya Vidyalaya

2018 – 2020
Palakkad, India

SKILLS

Flutter

Dart

Provider

BLoC

Google Cloud Firebase

Android Studio

REST API integration

Visual Studio Code

Git

GitHub

AWS

Figma

JIRA

Slack

Google Play Store

Apple Appstore

Revenuecat

Cashfree

Razorpay

FastAPI

Postgresql
